

hmap::Vec2< int >

std::vector< float >

shape

vector

hmap::Array

```
graph BT; A[hmap::Array] -.->|shape| B[hmap::Vec2< int >]; A -.->|vector| C[std::vector< float >];
```

The diagram illustrates a relationship between three types. At the bottom is a grey box labeled 'hmap::Array'. Two dashed purple arrows point upwards from this box. The left arrow points to a white box labeled 'hmap::Vec2< int >' and is labeled 'shape'. The right arrow points to a white box labeled 'std::vector< float >' and is labeled 'vector'.
